

Summary

Results-driven Data Scientist with a strong foundation in Mathematics and Software Engineering from Concordia University, specializing in Information System Security. Proficient in Python, SQL, and experienced in predictive modeling and data analysis. Actively pursuing certifications in machine learning to enhance technical expertise. Dedicated to leveraging analytical skills to solve complex problems and drive business success through data-driven decision-making.

Education

Concordia University

Montreal, QC

Master of Science in Information System Security

Jan 2024 – Present

Université des Mascareignes

Chandigarh, India

Bachelor of Science (Hons.) Software Engineering

Experience

Network Engineer

Orange Business, Mauritius

Jul 2020 – Jun 2023

- Led **network configuration** and migration projects, enhancing **network performance** and **efficiency** for large-scale systems using **Cisco IOS** and **Juniper**.
- Implemented **real-time performance monitoring solutions**, reducing system downtimes by 30%.

Security Analyst Intern

Rogers Capital, Mauritius

Feb 2022 – Dec 2022

- Utilized SIEM tools (**Splunk**, **QRadar**) for **security monitoring** and **event analysis**, reducing false positive rates by 25%.

- Improved **system security** through comprehensive **vulnerability assessments**, increasing compliance with industry standards.

SOC Analyst Intern

Central Water Authority, Mauritius

Jul 2021 – Feb 2022

- Enhanced **incident response** strategies, decreasing **mitigation time** for security threats by 20%.
- Developed and maintained **SOC operational protocols**, ensuring stringent adherence to security practices.

Projects

Data-Driven Predictive Modeling and Analytics

- Developed predictive models using **Python**, **Pandas**, and **Scikit-learn** to analyze historical data, achieving a 90% accuracy rate in trend forecasting.
- Implemented **data wrangling** and **feature engineering** techniques to prepare large datasets for analysis.

Machine Learning Model for Real-Time Data Processing

- Utilized **TensorFlow** and **PyTorch** to build and train models that effectively handle real-time data processing tasks, improving processing speed by 40%.
- Employed **cloud technologies (AWS, GCP)** to deploy scalable machine learning models ensuring robust performance under varying loads.

Technical Skills

- **Languages and Networking:** Python, SQL, Bash, Networking Protocols (TCP/IP, DNS, HTTP), Shell Scripting
- **Cybersecurity & Monitoring Tools:** Splunk, QRadar, Nessus, OpenVAS, Wireshark, Cisco IOS, Juniper, Kali Linux, Metasploit
- **Data Science Tools:** TensorFlow, PyTorch, Scikit-learn, Pandas
- **Cloud Technologies:** AWS, GCP
- **Identity and Access Management:** Azure AD, Okta, EDR, IDS/IPS, IAM(AWS)

- **Developer Tools:** Jira, Visual Studio, VS Code, PyCharm
- **Soft Skills:** Communication, Teamwork, Agile Mindset, Incident Management and Prioritization, Critical Thinking, Problem Solving

Certifications

- **Cisco Certified Network Associate (Cisco)**
- **SOC Analyst Training with Hands-on to SIEM (Udemy)**
- **Cybersecurity: Security Operations Center (SOC) Analyst (Udemy)**
- **Cybersecurity Fundamentals - Become a Security Expert**
- **Data Science Specialization (Coursera, Johns Hopkins University)**
- **Machine Learning by Andrew Ng (Coursera)**
- **Google Cloud Platform for Data Scientists (Pluralsight)**
- **Statistical Learning (Stanford Online)**
