

Summary

Highly analytical and detail-oriented Data Scientist with a Master's in Applied Computer Science from Concordia University. Proficient in statistical analysis, data mining, **machine learning**, and AI-driven methodologies, leveraging strong skills in Python, SQL, and **cloud platforms** like AWS and GCP. Experienced in deploying **scalable models** in cloud environments and excels at **data wrangling** and **feature engineering**. Committed to leveraging advanced analytical techniques and cutting-edge technologies to optimize business processes and drive data-driven decision-making.

Skills

- **Languages:** Python, SQL, Java, R, Tableau
- **Machine Learning Tools:** TensorFlow, PyTorch, Scikit-learn
- **Cloud Platforms:** AWS, GCP
- **Data Analytics:** Predictive modeling, business intelligence, **data wrangling**, **feature engineering**, statistical analysis
- **Developer Tools:** Jira, DataBricks, VS Code, Visual Studio, PyCharm, IntelliJ, MS-Excel, Google Analytics
- **Libraries:** Pandas, NumPy, Matplotlib, TensorFlow, OpenCV

Experience

- **Machine Learning Research Intern**
 - Chitkara University, Chandigarh, India
 - Feb 2023 – June 2023
 - Designed and refined multiple machine learning models using supervised and unsupervised techniques. Deployed applications using Flask and Streamlit, focusing on **privacy-preserving methods** and **data integrity**.
 - Conducted extensive **data preprocessing** and performance evaluations, enhancing model effectiveness.
- **Business Analyst Intern**
 - MiQ Digital, Bangalore, India
 - Jul 2022 – Feb 2023

- Partnered with U.S. market teams to develop analytics strategies, improving decision-making through **business intelligence** and **data-driven insights**.
- Created **automation solutions** and integrated new APIs, optimized business strategies, enhancing account operations and project outcomes.

Projects

- **Fitty Bot (Fitness and Wellness)**

- Developed an intelligent fitness chatbot using Python, Flask, and SpaCy. Implemented NLP techniques and integrated LLMs to analyze user inputs and provide personalized fitness recommendations dynamically.

- **Blinkit Grocery Dashboard**

- Constructed a Power BI dashboard to monitor grocery sales and performance, utilizing **real-time data tracking** and visualizations to enhance operational efficiency.

- **Sales Forecasting Model**

- Developed a sales forecasting model using TensorFlow and deployed it on AWS to demonstrate predictive modeling and cloud deployment capabilities.

- **Real-time Data Wrangling Project on IoT Device Data**

- Showcased ability to handle real-time data streams, performing essential **data wrangling** for IoT devices, preparing data for advanced analytical tasks.

Education

- **Concordia University**

- Master of Science in Applied Computer Science
- Montreal, QC, Jan 2024 – Present

- **Chitkara University**

- Bachelor of Engineering in Computer Science
- Chandigarh, India

Certifications

- **AWS Certified Big Data - Specialty**
- **Advanced Machine Learning with TensorFlow on Google Cloud Platform**
- **Data Visualization with Python – IBM**
- **Business Analytics with Excel – Simplilearn**
- **SQL Programming – HackerRank**
- **Statistics 101 – IBM**
- **Google Cloud Essentials - Google**

By including specific technologies used in projects, mentioning relevant courses under education, and adding precision through quantification of results, this revised version aligns closely with the job description for a Data Scientist role.
