## ## Summary

Dynamic AI Developer with substantial experience in data engineering and software development, specializing in building and deploying AI-driven applications using Python, TensorFlow, and cutting-edge ML models. Skilled in automating and optimizing ETL pipelines, and creating intelligent solutions like chatbots and customized API integrations. Focused on leveraging advanced NLP and machine learning to develop innovative AI applications, aiming to further specialize in generative AI technologies to deliver impactful solutions across various domains.

## ## Education

### **Master of Science in Applied Computer Science**

\_Concordia University, Montreal, QC\_

Jan 2024 – Dec 2025

### **Bachelor of Engineering in Computer Science**

\_Chitkara University, Chandigarh, India\_

## ## Experience

### **Data Engineer**

\_Avo Automation Pvt Ltd, Bengaluru, India\_

Jul 2023 – Dec 2023

- Optimized ETL pipelines using AWS, SQL, and Python, reducing data processing time by 25%.
- Implemented and maintained data quality tracking to detect and resolve anomalies swiftly.
- Developed Power BI dashboards for in-depth performance and KPI analysis.

### **Machine Learning Research Intern**

Feb 2023 – June 2023

- Built and deployed MLOps pipelines for automated model deployment using CI/CD, Docker, and Kubernetes.

- Applied prompt engineering techniques in GPT and LLaMA models focused on enhancing NLP-based insights and interactions.
- Designed and implemented scalable workflows using Apache Spark & SQL, optimizing large-scale data processing.

### **Business Analyst Intern**

\_MiQ Digital, Bangalore, India\_

Jul 2022 – Feb 2023

- Engineered automated data extraction and transformation processes using Python, SQL, and APIs, improving efficiency by 30%.
- Developed real-time ETL workflows to integrate multi-source data effectively.
- Collaborated with North American clients to optimize operations through data-driven insights and custom automation.

### **## Projects**

#### **AI Content Generator for Blogs and Social Media**

Sept 2024 – Sept 2024

- Created a text generation tool using PyTorch and Hugging Face's GPT-2 model, achieving a 30% reduction in content creation time.
- Developed a Flask and Streamlit-based web application that generates AI-driven content for varied digital platforms.

#### **Fitty Bot (Fitness and Wellness Chatbot)**

Jul 2024 – Aug 2024

- Engineered a smart fitness chatbot using Python, Flask, and SpaCy, focusing on NLP to deliver personalized wellness plans and tips.

#### **Blinkit Grocery Dashboard**

Sept 2024 – Sept 2024

- Designed and integrated a comprehensive Power BI dashboard to enable real-time grocery sales and customer insights analysis.

### **## Technical Skills**

**Languages:** Python, SQL (Postgres, Snowflake), JavaScript

**Frameworks/Libraries:** PyTorch, TensorFlow, Pandas, NumPy, Matplotlib, OpenCV

**Developer Tools:** AWS, Docker, Kubernetes, Git, VS Code, Jira

**Data Analytics:** Apache Spark, Hadoop, Fivetran, dbt, Power BI, Google Analytics

**Soft Skills:** Critical Thinking, Problem Solving, Project Management, Communication, Teamwork

### ## Certifications

- Data Visualization with Python – IBM
- Apache Spark with Python – Big Data & PySpark (Udemy)
- Machine Learning and AI with TensorFlow (Coursera)
- PyTorch Fundamentals (Coursera)

### ## Professional Development

- Actively pursuing courses on PyTorch and advanced model fine-tuning to enhance generative AI capabilities.
- Engaged in community forums and workshops focused on synthetic media and AI-driven content generation.

...

This markdown-formatted resume captures the suggested changes and integrates relevant skills, experiences, and projects to closely match the job description of a Generative AI Developer.
